40th IAHS World Congress on Housing Sustainable Housing Construction

December 16-19, 2014

Funchal, Madeira, Portugal

Câmara Municipal do Funchal, by Francisco Correia

The 40th IAHS World Congress, on the theme “Sustainable Housing Construction”, will be an ideal forum to disseminate recent advances and discuss future trends towards a more sustainable and energy-efficient construction industry. The main purpose of the congress is to debate topics related to new environmentally friendly construction materials and technologies, energy efficiency in buildings, waste management, and other topics linked to sustainability in construction. However, the broad scope of the International Association for Housing (IAHS) series of congresses also makes this an excellent place to discuss any issue related to housing science.

TOPICS

- Urban Planning
- Economics, Financing and Management
- Building Design
- Materials and Building Technology
- Sustainability and Energy Efficiency
- Building Physics
- Refurbishment
